

CNE PROGRAM ON THERAPEUTIC COMMUNICATION IN NURSING

As a part of High Tech - High Touch club Activity, under Student Nurses Association (SNA), students organized a club activity on THERAPEUTIC COMMUNICATION IN NURSING on 21.09.2026 at 11:00 to 01:30 pm in SVCN seminar hall. Ms.K.Hemalatha – 6th Semester, Ms.A.Vyshnavi – 4th Semester, Ms.B.Likithaprasuna – 2nd Semester are the speakers for CNE program. The CNE topic "Therapeutic Communication in Nursing" is highly relevant in the present-day nursing curriculum and clinical practice. The importance of the topic was well justified by the presenters who explained that communication is the first tool of assessment and the most powerful tool of care. Without therapeutic communication, even technically competent care remains incomplete. The student presenters deserve special appreciation for selecting such a meaningful topic and presenting it with utmost dedication. Their presentation skills, teamwork, creativity in making charts and their ability to connect theory with clinical reality was excellent. The role-play on SBAR communication was the highlight of the day and received huge applause from the audience. Dr.Lavanya Pachipala - Principal and Mrs.R.Bhuvanasai, SNA Advisor and other faculty congratulated the presenters and said that they have set an example for future club activities. The program truly proved that when students are given an opportunity, they can perform beyond expectations.

SNA-HITECH HI TOUCH CARE CLUB ACTIVITY
